

Manager / Admin Reference

For managers only. The employee cards (01–12) are short on purpose. The full rules, evidence standards, and reasoning live in the **master SOP**: *Vox Nova Producer Placement Operations SOP v1.0* (52 pp). If a card and the SOP ever disagree, the SOP wins. Fix the card.

Settings

Decisions only a manager makes

Decision	Where it comes up
Accept any difference between the agreement and the confirmed terms	Card 04 Part A
Set "LOD not required" (with the reason written down)	Card 06
Approve invoicing before full execution	Card 05

Decision	Where it comes up
Accept "payment will follow release" for the release check	Card 07
Approve an "open items" email to a label before release	Card 07
Mark any release-check item N/A	Card 07
Close a placement as NOT PLACED	Card 02
Every 📄 on card 09	Card 09

Anything that needs a legal, tax, or accounting judgment goes to the producer's attorney or accountant. These cards are operations controls, **not legal advice**.

Escalation priority

Priority	Situations	Respond
Urgent	Producer asked to sign before LOD · release ≤ 10 BD with items open · second payment route · anyone asks staff to sign, give bank details, or take funds	Same business day
High	Term conflicts · new collaborator · sample · agreement $\neq$ terms · amount mismatch · LOD problems · disputes	≤ 2 BD
Normal	Identity/entity questions · splits don't add up · no reply after final follow-up · misspellings	≤ 2 BD

Weekly manager review (Monday)

- ☐ Every open placement has a next action + due date + owner
- ☐ No request is past its escalation day without an escalation
- ☐ Every release ≤ 10 BD shows READY or an escalation
- ☐ No placement shows "paid" without proof in 06_Payment/
- ☐ No producer signed before the artist's LOD (check dates on the record)
- ☐ Spot-check one closed placement with the six-month test (card 10)

Later (not built yet)

Placement economics. Once enough placements are closed with confirmed payments, the payment records can feed a placement P&L (revenue $\rightarrow$ advance $\rightarrow$ admin/commission $\rightarrow$ producer share $\rightarrow$ expenses $\rightarrow$ net). Payment tracking comes first. Don't build the P&L before the data exists.

Keyman app module. These cards become screens: a home work queue (🔴 needs action / 🟡 waiting / 🟢 moving) and a placement cockpit (stage, next action, deal snapshot, progress, evidence, and actions: Send Follow-Up · Request LOD · Upload Evidence · Add Note · Escalate).
